

Resource Advantage Wavelength Pharmaceuticals Home Page, March 2019

We are Wavelength Pharmaceuticals, a world-class, standalone **Active Pharmaceutical Ingredient (API)** developer and manufacturer. We produce **more than 250 metric tons of APIs every year**, and are capable of delivering on a **wide range of production needs**, from grams to multi-ton commercial quantities.

Our reputation is grounded in a long heritage of excellence. **For 32 years**, we have consistently produced **high-quality APIs**, while maintaining an **exceptional regulatory track record** with the leading global regulatory authorities (USFDA, EU-EMA, PMDA, TGA, KFDA, ANVISA, and COFEPRIS).

At Wavelength, we have cultivated our core strengths in **complex chemistry, crystalline forms, and particle design**, and have made strides in the development of **innovative manufacturing processes**. Our expertise extends to our ability to deliver on regulatory demands, and has earned us a total of **198 globally registered DMFs**.

At the heart of our enterprise is a **highly experienced and accessible management team** that puts our **customers first**. We are on the **same wavelength**, always in tune with our customers, ready to provide the support required to satisfy their needs. Contact us to learn more about our **customized solutions** and **flexible business models**, and how we may tailor a solution to meet your individual requirements.
