

## The Webcast Begins at 6:00 PM EST

Severe asthma remains underrecognized and undertreated. Uncontrolled asthma places a substantial burden on patients, their families, and the healthcare system.

With significant individual variability of symptoms, frequency of attacks and triggers, coupled with age-related treatment differences, management of severe asthma continues to be a clinical challenge.

Join us for this dynamic educational activity designed to bring you the latest evidence and guideline approaches in asthma for your most difficult-to-treat patients of all ages. An engaging panel discussion will review the latest guidelines for management of asthma with a focus on the specific algorithms for difficult-to-treat and severe disease in adults and pediatric patients.

[Click Here to Tune In!](#)

### What You Will Learn:

- Review guidelines and recommendations for management of severe asthma in patients across age groups
- Discuss efficacy, safety, and considerations for patient age in selection of agents for severe asthma
- Evaluate efficacy and safety of agents for treatment of CRSwNP and other comorbid conditions of severe/difficult-to-treat asthma

### Program Chair:

**Reynold A. Panettieri, Jr., MD**  
Emeritus Professor of Medicine  
University of Pennsylvania  
Philadelphia, PA  
Science Professor of Medicine  
Robert Wood Johnson Medical School  
Vice Chancellor for Translational Medicine and Science Director  
Rutgers Institute for Translational Medicine and Science  
New Brunswick, NJ

### Faculty:

**Natasha McClure, DNP, RN, CPNP**  
Assistant Professor  
Vanderbilt University School of Nursing  
Faculty Head of North House, The  
Martha Rivers Ingram Commons  
Nashville, TN

**Michael E. Wechsler, MD, MMSc**  
Professor of Medicine  
Director, The Cohen Family Asthma  
Institute  
Division of Pulmonary, Critical Care &  
Sleep Medicine  
National Jewish Health  
Denver, CO
